

ADDITIONAL NOTICE FOR MEDICARE PATIENTS

Relative Contraindications to Dynamic Thrust Adjusting (rarely performed in this office):

Do you have any of the following conditions? Check any that apply.

- Joint Hypermobility
- Osteoporosis/Osteopenia
- Benign Bone Tumors
- Bleeding Disorders
- Blood Thinners
- Progressive Radiculopathy

***NOTE:** If you currently have, or have had, one of the above-listed conditions, Medicare requires that we advise you that spinal manipulation and other forms of dynamic thrust **may** be contraindicated in your condition. By signing below, you consent to care and agree to inform this office if another health care provider tells you that you have one of these conditions.*

Absolute Contraindications to Dynamic Thrust Adjusting (rarely performed in this office):

Do you have any of the following conditions? Check any that apply.

- Rheumatoid Arthritis
- Ankylosing Spondylitis
- Ligament Laxity
- Joint Dislocation
- Recent/Unstable Joints
- Unstable/Missing Dens at C2
- Spinal Cancer
- Spinal/Joint Infection
- Myelopathy/Cauda Equina Syndrome
- Vertebrobasilar Insufficiency Syndrome
- Arterial Aneurysm

***NOTE:** If you currently have, or have had, one of the above-listed conditions, Medicare requires that we advise you that spinal manipulation and other forms of dynamic thrust is **absolutely contraindicated** in the region of the spine that is affected. By signing below, you agree to inform this office if another health care provider tells you that you have one of these conditions.*
