

NOTICE OF NON-COVERAGE FOR MEDICARE SERVICES

It is important that you understand that Medicare does NOT pay for all chiropractic services. Medicare pays only for chiropractic adjustments that they consider medically reasonable and necessary.

Medicare will not pay for certain services in this office, including but not limited to:

1. Initial exam or re-exams
2. X-rays, when performed by a chiropractor
3. Physical therapy modalities such as low level laser therapy
4. Exercise Instruction
5. Nutritional supplements or dietary advice
6. Any tests performed in our office
7. Maintenance or wellness care

Payment of services:

Special fees apply for chiropractic adjustments for Medicare patients (less than our usual and customary fees). We will bill Medicare on your behalf, but we do not accept assignment, so you will pay for your services at each visit, for which you will receive a payment-at-time-of-service discount of 15%. You will receive reimbursement checks directly from Medicare which will be yours to keep. Medicare will not reimburse you for your yearly deductible, co-payments, and all non-covered services (see above). Supplemental insurance may cover services that Medicare does not cover. If you are unable to pay any portion of your care, please us know so that we can work out financial arrangements with you.
